Weighing the positive aspects of our national survey for TV Engineering Jobs that offer career stability and security.

1. Since the organization has been in business for 200 years and their revenue model is not ad driven, they will continue to be in business for another 200 years unless the Earth stops spinning.
2. The TV organization and the parent company are a great place to work. The corporate culture, work / life balance and caring, upbeat, happy work environment is real.
3. The Media Company offers (2) two pension, a 401K savings and comprehensive benefits for single and family needs. Most companies don't offer pensions any longer. This company offers (2) and a 401K. This is of substantial financial value. It would cost many millions of dollars in personal savings to equal what this company provides to its Chief Engineer for FREE. This Chief Engineer will vest for retirement in 5 years. This is substantial and we could not find another firm in America that provides this to their Chief Engineers.
4. The TV Network, their radio show, MSO distribution and more are located in the #1 DMA in the country. This is sophisticated broadcasting that will be brought into the future by this Chief Engineer. They will build and operate their ideal environment from a business, technical and creative perspective. They will be creating their own world.
5. The job is hands-on. No rose petals and steamed milk lattes or flying a desk. This chief engineer is needed and will be a vital executive offering guidance to senior management, producers, editors and vendors. This job is essential not a "layer" in a bloated environment. The job and the organization both assure career stability and security. Brooklyn, NY. The advantages are many
